

Year R Learning Journey

Week beginning: 1st October 2018

Next week our topic will be:

Autumn

This week we will be exploring the outside area and our field to talk about Autumn changes.

In Discovery Time we will be able to use natural resources to make autumn pictures along with lots of other exciting things to choose from.

In maths we will be learning about 2D shapes. We will be naming them, finding them in our learning environment and discussing their properties.

Please remember:

That once you have brought your child into school and they are settled can you please make sure you leave by 8:55 so that gates can be closed and locked for your child's safety.

Words of this week:

go to was

Sounds of this week:

g o c k

Home Challenge

Can you talk to your children about the different seasons?

We will be learning about Autumn so can you go on an Autumn walk and bring in any signs of Autumn you can find?

This could be the objects themselves or you could draw or paint a picture.

How you can help at home:

- ✓ Practise counting at home with your child. Use this game as a fun way to practise counting and recognising numbers.

<http://www.topmarks.co.uk/Search.aspx?Subject=37>

You could also play one of these shape games together:

<https://www.babytv.com/learning-center-shapes.aspx>

- ✓ Continue to practise key words with your child every day. Knowing these words will help your child to read more fluently. You could play a game by spreading out the flashcards we have sent home on the floor and taking turns to throw a small object onto a card. To win the card your child has to say the word that is written on it.
